Overview

PisoCAKE is a financial guidance web application created to help users manage, monitor, and achieve their personal financial goals in a structured yet convenient way. The name “PisoCAKE” is a wordplay on the saying “piece of cake” implying that managing finances can be simple and the singular Philippine currency “piso”, highlighting its local relevance. Our naming reflects the application’s mission: to make financial management easier and more accessible for everyone.

The platform is designed with accessibility and practicality in mind, allowing users to take control of their finances without needing advanced financial knowledge. It combines intuitive design with flexible features, enabling users to track their goals, monitor budgets, and log transactions.

PisoCAKE primarily caters to individuals who want to work toward specific financial objectives while developing greater financial awareness and discipline. Whether the goal is to save for a significant purchase, pay off debt, or gain better control over daily expenses, PisoCAKE provides tools that make the process easier and more engaging. It is especially beneficial for people who prefer a simple but effective way to manage money, whether they are beginners at budgeting or already practicing some form of expense tracking.

The main challenge PisoCAKE addresses is making financial goals more achievable and the expense tracking process more convenient. Many people abandon their budgeting or goal-tracking efforts because of complicated tools, inconsistent monitoring, or a lack of clear progress indicators. PisoCAKE wants to solve these issues by offering an easy-to-use platform with features that guide the user step by step from setting realistic goals to monitoring daily spending and reviewing progress over time.

Key features of PisoCAKE include:

Goal Tracking with the SMART Goal Framework – Users can create specific, measurable, achievable, relevant, and time-bound financial goals. This framework ensures that goals are not only clearly defined but also realistic and trackable.

Multiple Transaction Logging Methods – The application supports both manual logging for users who want complete control and semi-automated logging for those who prefer convenience and speed. This flexibility allows users to choose the method that best fits their lifestyle.

Budget Management and Re-evaluation – Users can set budgets for different spending categories, regularly review them, and make adjustments based on actual spending patterns. This ensures that financial plans remain aligned with changing circumstances.

Bill Tracking – PisoCAKE includes features to help users monitor upcoming bills and due dates, reducing the risk of missed payments and late fees.

Progress Review and Insights – The application allows users to periodically assess their overall financial status, providing valuable insights into spending habits and goal achievement.

Installation

To get started with the application for the experiment, please follow the following steps:

> ℹ️ **NOTE**
>
> We **strongly recommend** using the app on a **mobile device** as much as possible.

On mobile (Android and iOS):

1. Go to your mobile device's web browser and type in the following link: https://ths-st-2-finance-app.vercel.app/
2. Press the Browser Menu button (icon on Google Chrome on Android,  icon on Safari on iOS).
3. Press the "Add to home screen" button.
4. Go to your mobile device's home menu.
5. Open the newly added app.
6. Proceed to the next step.

On desktop (PC or laptop):

1. Go to your desktop device's web browser and type in the following link: https://ths-st-2-finance-app.vercel.app/
2. Proceed to the next step.

Interface Walkthrough

Provide users with a quick walkthrough of the interface, especially its key elements. The detailed description of the individual pages, the information shown, and their interactive elements should be discussed in their respective sections.To get started with the application for the experiment, please follow the following steps:

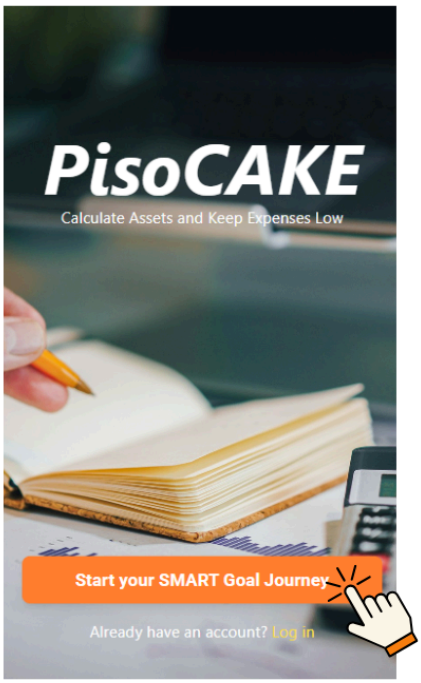

Creating an Account:

Creating an account is the essential first step to fully utilizing the application. Before you are explicitly asked to create an account, you will first go through onboarding, where you will set a financial goal, and the app will guide you with the help of the SMART Goal-Setting principle, which is defined by **five** essential factors:

- **S** - Specific
- **M** - Measurable
- **A** - Attainable
- **R** - Relevant
- **T** - Time-bound

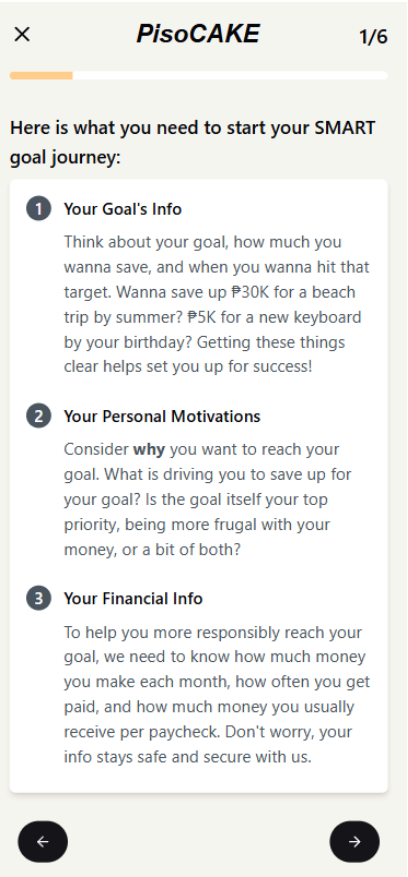

Onboarding Process (Goal Setting Process):

When launching the PisoCAKE app, you will be greeted by the app's title page. Please press the "Start your SMART Goal Journey" button to get started with the app.

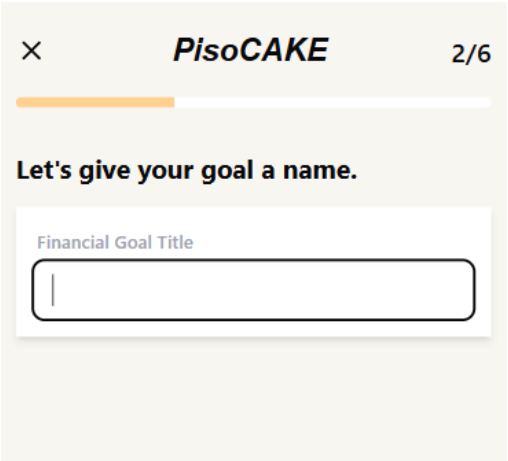

During the onboarding process, the following information related to your financial goal will be asked of you. You must input the correct information:

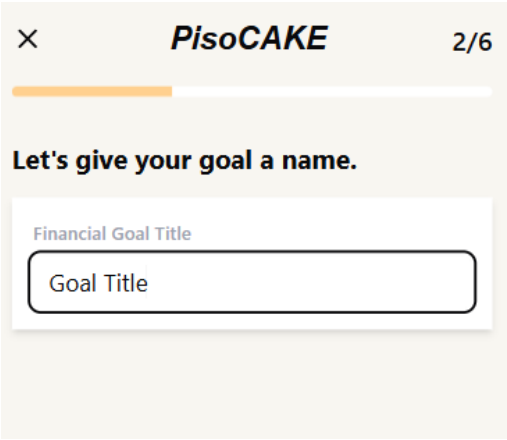

1. **Information Page**

The screen is the first step of setting up your SMART goal in PisoCAKE. It introduces the key information you'll need before starting your savings journey. The page explains three simple areas to consider: Your Goal's Info, Your Motivations, and Your Financial Info. Each section is presented in clear, friendly terms so you can easily prepare, even if you are unfamiliar with financial apps. Once you are ready to go to the next step, click on the arrow button on the lower right to proceed and you are also given a back button in order to go to the previous page.

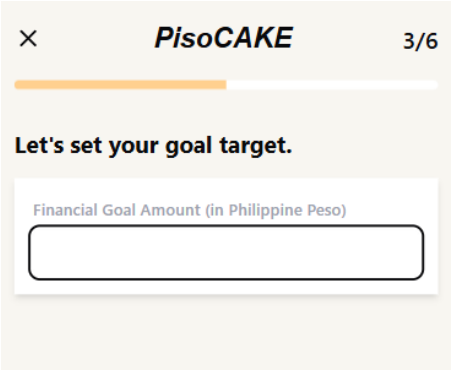

2. Financial Goal Title

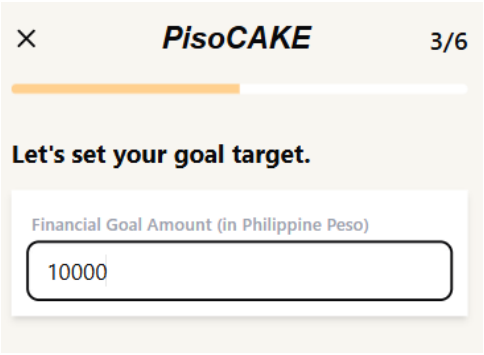

This page provides you with a text box where you can enter the name of your personal financial goal. This will serve as the title of your goal, helping you easily identify it throughout your journey in PisoCAKE. Choose a name that clearly reflects the purpose of your goal, such as “Beach Trip Savings” or “New Laptop Fund,” so it’s both meaningful and easy to remember.

3. Goal target amount

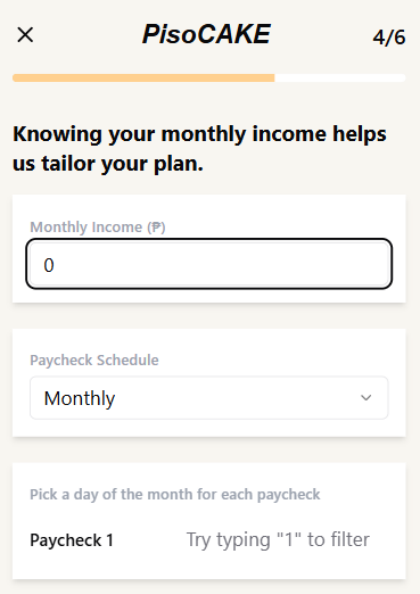

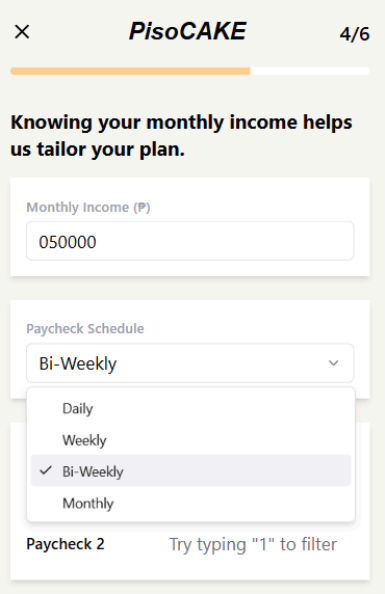

This page provides a text box where you can enter the total amount of your financial goal, expressed in Philippine pesos (₱). This amount represents the target you aim to save by the end of your goal period. Make sure to input a realistic figure that matches your needs and savings capacity, such as ₱5,000 for a small purchase or ₱30,000 for a bigger expense.

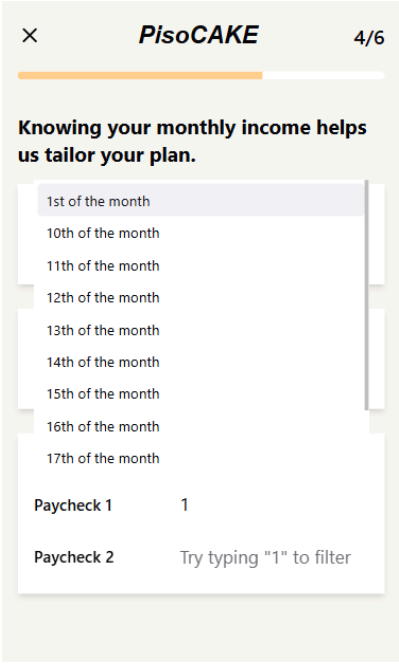

ℹ️ **NOTE**

Do not use commas when entering the amount (e.g., type “10000” instead of “10,000”).

4. Monthly income plan

This page requires you to provide key financial details that will help PisoCAKE create a savings plan tailored to your situation. You will be asked to input the following:

- **Monthly Income**
  - the total amount you earn in a month
- **Monthly Income Frequency**
  - how often you receive your income daily, weekly, bi-weekly, or monthly
- **Paycheck Cycle Dates**
  - the specific day or days in the month when you receive your paycheck
- **Current On-Hand Money**
  - the amount you currently have available for paying bills and other expenses.

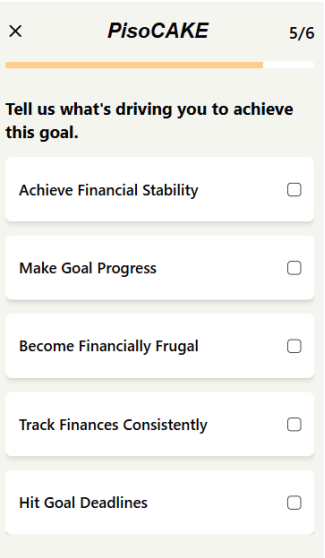

Providing accurate information ensures the application can give you realistic and achievable goal recommendations.

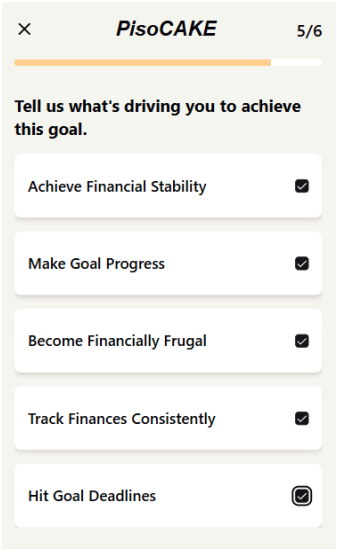

ℹ️ **NOTE**

To select your paycheck dates, enter the day of the month when you typically receive your paycheck. This will generate a list of options for you to choose from.
For example, if you type “1,” you will see the option for the “1st day of the month.” Simply click on this choice to confirm your selection.

Do not use commas when entering the amount (e.g., type “10000” instead of “10,000”).

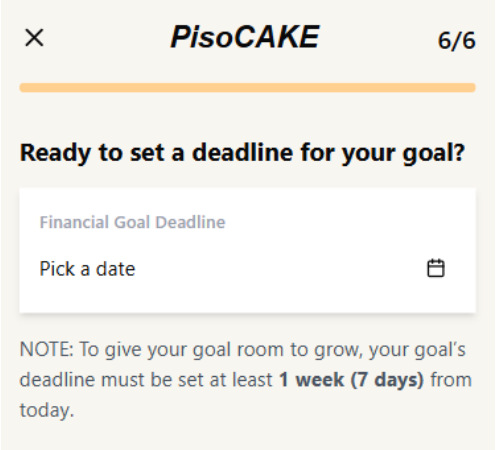

5. Goal motivations

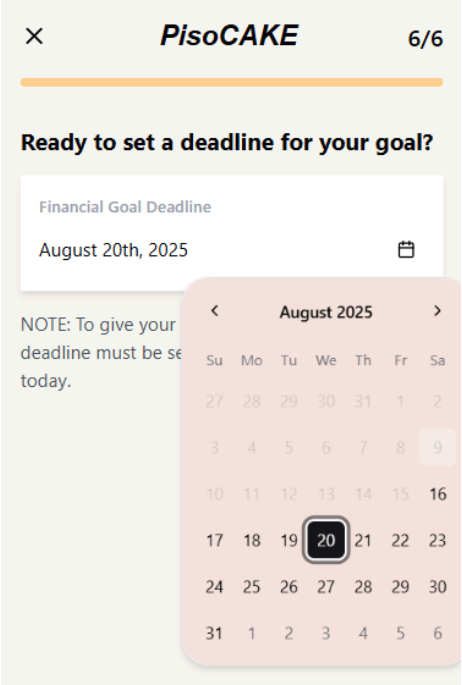

In the fifth step of the onboarding process, you are presented with five choices for your motivation behind this goal. These options represent common reasons why people save, such as making a planned purchase, funding a trip, building an emergency fund, investing in education, or preparing for a special event. Simply select the option that best matches your reason, so PisoCAKE can better understand and personalize your savings journey.

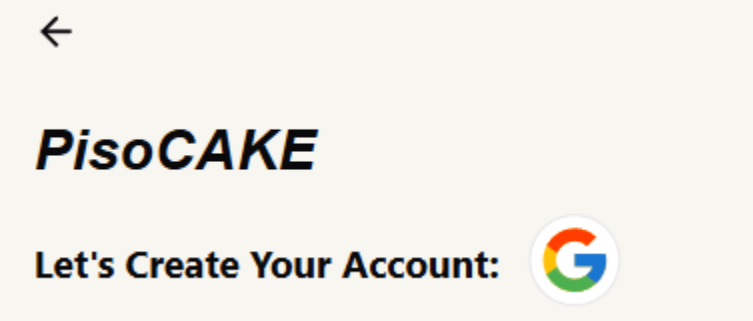

6. Goal deadlines

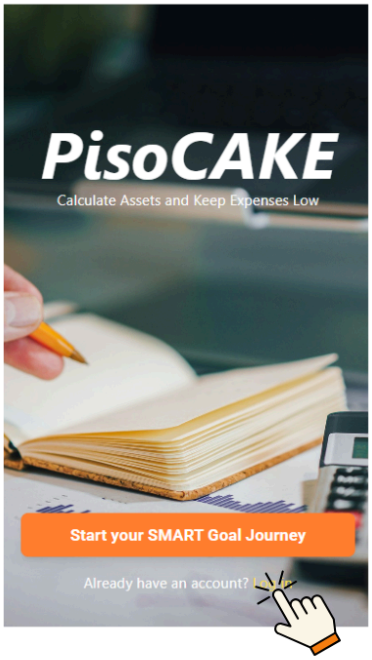

This page asks you to set the deadline for achieving your financial goal. This is the target date you aim to reach your savings amount. For practicality and effective planning, the deadline must be at least one week from today. This ensures you have a reasonable time to progress toward your goal.

Account Creation

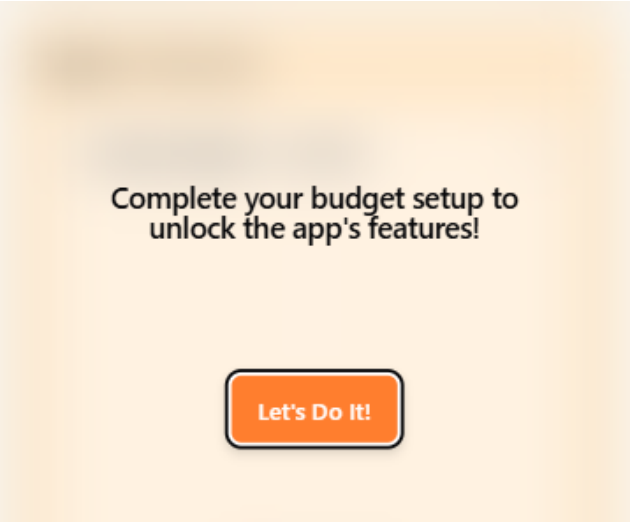

Once you have completed the goal-setting process, you will be prompted to sign in with your Google Account. This account will serve as your main profile in PisoCAKE, allowing the app to store and manage your goal details securely. Logging in at this stage will finalize all the information you set during onboarding, ensuring your progress is saved and accessible across devices.

Log In

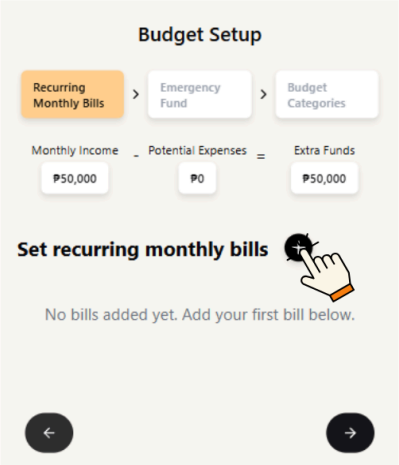

If you already have an existing account, you will not be required to go through the onboarding and account creation process again. Instead, you can simply log in using your linked Google Account for PisoCAKE, giving you quick and direct access to your goals and saved information.

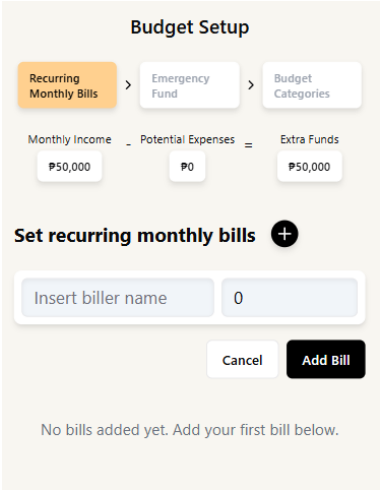

Budget Setup

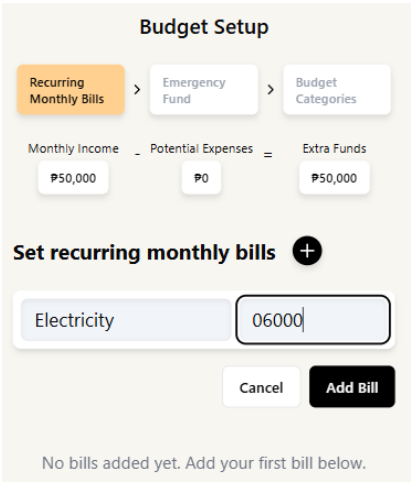

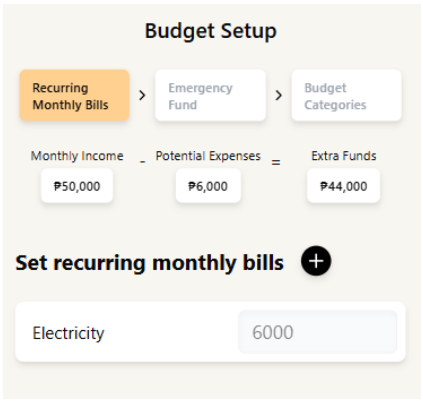

Once you have logged in to PisoCAKE for the first time, you will be prompted to set up your budget, the second and final step before unlocking all the app's features. This process helps you organize your income, expenses, and savings so the app can provide personalized insights and recommendations. You will be asked to provide details about your current financial situation through three steps: allocating funds for your emergency savings, categorizing your bills and expenses, and defining your monthly budget limits. Setting up your budget early ensures your financial goals are supported by a clear and manageable plan.

Monthly Bills

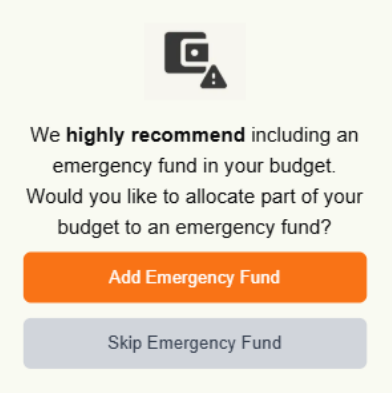

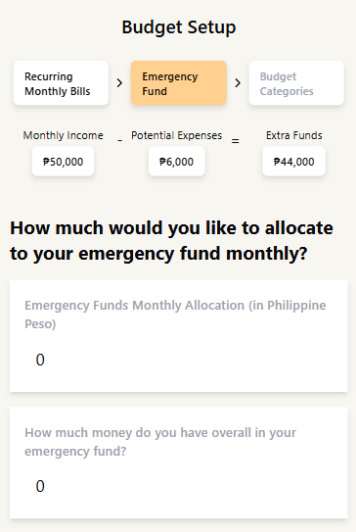

The first step of the budget setup process is to provide information about your monthly bills. You will be asked to enter the following details:

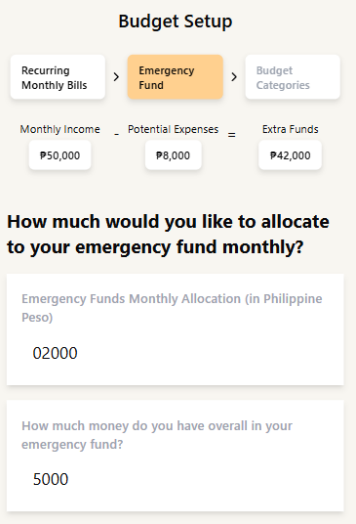

- **Monthly Bill Name**
- **Monthly Bill Amount**

For the most accurate budgeting and recommendations, please ensure the information you provide is as precise and up to date as possible.

Emergency Fund

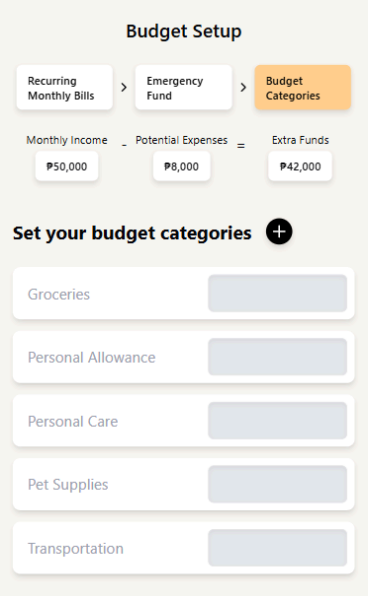

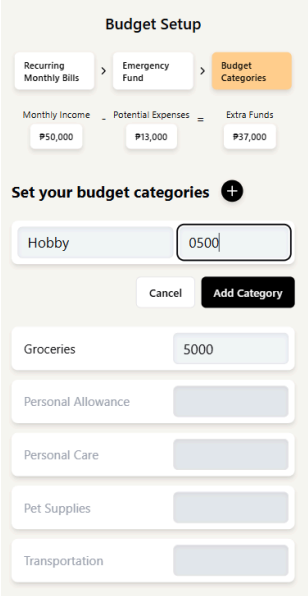

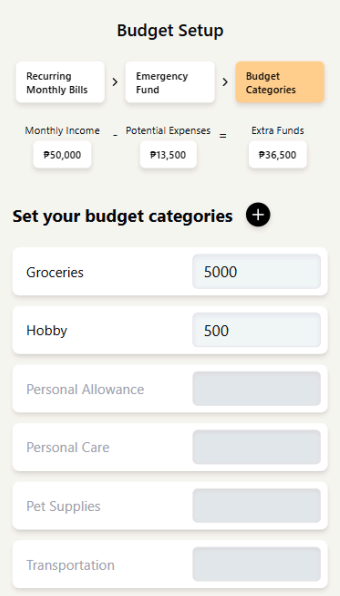

The second step in the budget setup process focuses on your emergency fund. While this step is optional and can be skipped, setting aside a portion of your monthly income is strongly recommended. An emergency fund is primarily meant for unforeseen situations, such as medical emergencies or sudden expenses, but it can also represent your regular monthly savings.

In this step, you will be asked to provide the remaining amount of the Emergency Fund (the amount you have set aside for your emergency). Providing this information helps PisoCAKE better guide your savings and ensure you are financially prepared for unexpected events.

Budget Categories

The third and final step of the budget setup process will ask you to define your budget categories. This is where you list the living expenses you regularly spend from your monthly income. PisoCAKE provides several preset budget categories for your convenience, such as Groceries, Transportation, Personal Allowance, and more. All of which you can freely edit or remove based on your needs. You can also create new categories to reflect your spending habits better.

For each budget category you add, you will be asked to provide the following:

- Budget Category Name – The label or title you want to give to your budget category
- Budget Category Remaining Amount – The amount you have set aside for spending in this category for the month.

After Budget Setup

Once you have completed all three steps in the budget setup process, PisoCAKE will display a series of screens confirming that your budget has been successfully set up.

If you did not allocate your entire monthly income during the budget setup, the remaining amount will automatically become your Extra Funds. This represents the maximum amount you are expected to use monthly, primarily to add money to your financial goals. However, you may also use these funds for expenses outside your regular financial commitments and obligations.

In cases where you spend more than expected on your bills or budget categories, you can allocate part of your Extra Funds toward covering these additional costs.

After this process, all application features will be fully unlocked and ready to use.

App Header

This is one of two elements in PisoCAKE that is visible on all main pages, giving you quick access to key features at any time. From here, you can easily open your Notification History and User Profile.

Notification History

The Notification History contains a complete list of all reminders and feedback you have received (also known as feedback reminders). Items are arranged from the most recent to the oldest, and each entry clearly shows whether it is still pending or has already been resolved.

To view your Notification History, simply click or tap the bell 🔔 icon located in the header.

User Profile

The User Profile is where you can access and customize a selection of the app's settings to suit your preferences. From here, you can manage personal details, adjust application behavior, and review account information linked to your Google Account.

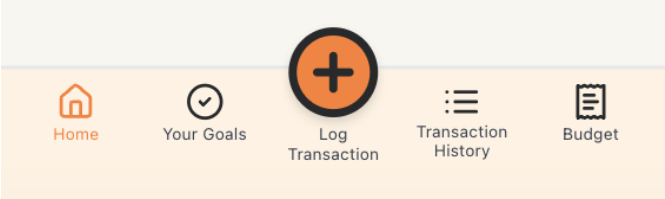

To open your User Profile, simply click or tap the user icon located in the header.

Navigation Bar

This is one of two elements in PisoCAKE that remain visible on all main pages, allowing you to move between key sections of the app quickly. From here, you can access the following features:

- **Home Page**
- **Your Goals Page**
- **Log Transaction**
- **Transaction History Page**
- **Budget Page**

Except Log Transaction, selecting any of these buttons on the navigation bar will redirect you to its corresponding screen within the application. The Log Transaction button, on the other hand, opens a dedicated interface for recording a new financial transaction without leaving your current page.

Log Transaction

Clicking the Log Transaction button on the  navigation bar will present you with three options for recording your transactions:

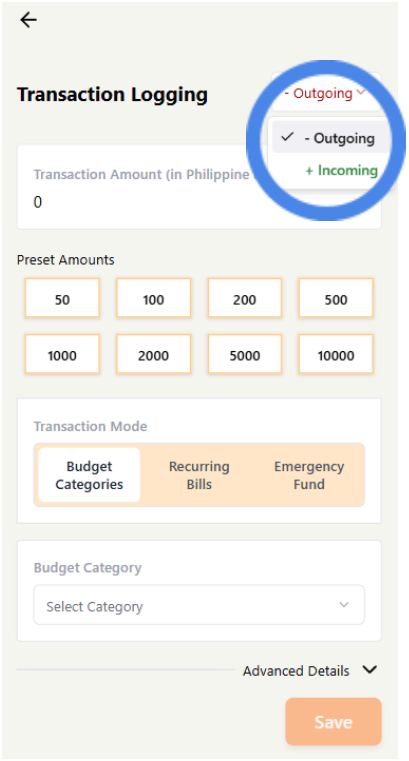

- Manual Input – You can log a transaction by entering the required details into the app.
- Receipt Scan – Uses your mobile device's camera to scan a paper or digital receipt. You can highlight the critical information on the receipt, and the app will automatically capture the transaction details.

- SMS Extract – Lets you copy and paste a text message from a bank or payment processor. The app will automatically extract the necessary details from the message to log the transaction.

These options give you flexible and convenient ways to record your financial activities in PisoCAKE.

Manual Input (Default)

When using the Manual Input option to log a transaction, you will be required to manually enter each detail of the transaction you wish to record.

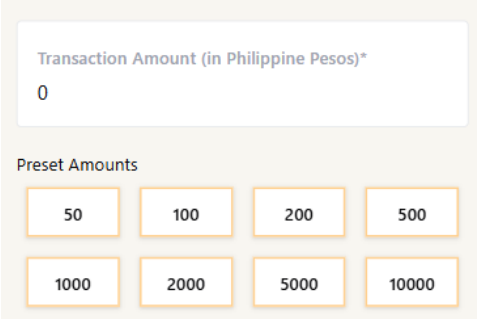

Before entering any specific details, make sure to select the correct transaction type:

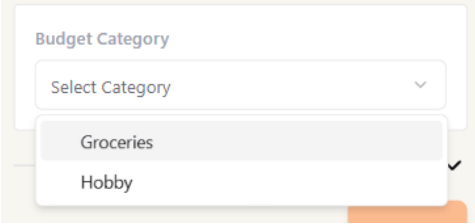

- Outgoing – A transaction where you spend money, which deducts funds from your budget.
- Incoming – A transaction where you receive money, which adds funds to your budget.

ℹ️ **NOTE**

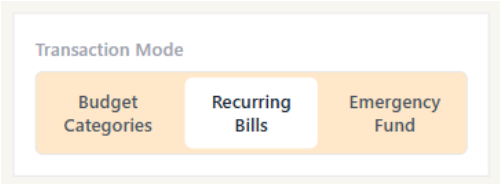

> Do **NOT** use the “Incoming” transaction type to add funds from your paycheck. If you want to incorporate money from your paycheck into your budget, you must follow the “Paycheck Process,” which is explained in a later section of the instruction manual.

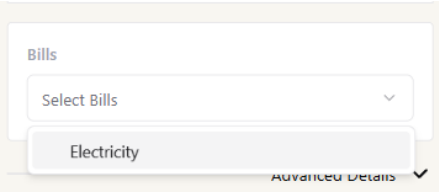

There are preset amount buttons available for you to press for easier inputting of the most common transaction amounts.

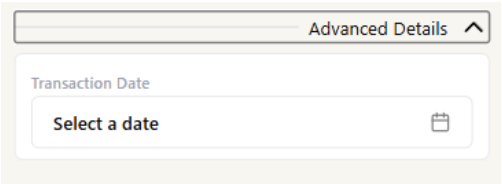

The transaction logging process assumes that the transaction you are recording is an expense belonging to one of your budget categories. If this applies, select the correct budget category for your transaction from the dropdown menu. This ensures the expense is tracked correctly and deducted from the allocated funds for that category.

If the transaction you log is intended for your monthly bills, switch to the Recurring Bills option in the “Where to log the transaction” section. Once selected, a dropdown menu will display all your

listed bills, allowing you to choose the specific bill that matches your transaction. This ensures the payment is accurately tracked and deducted from the budget allocated for that bill.

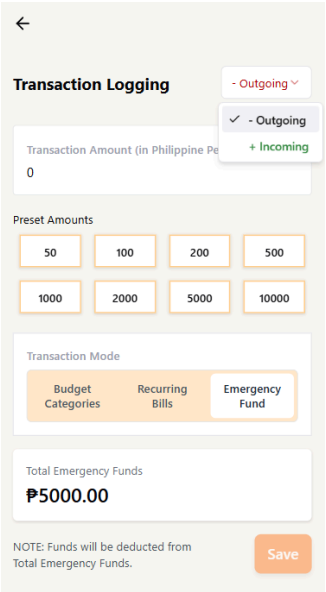

While the basic information mentioned above is enough to log a transaction, you also have the option to include advanced details for more precise record-keeping.

If you wish to log an expense to a budget category and add advanced details, click the down arrow next to “Advanced Details” to reveal two additional text fields:

- Transaction Date – Lets you specify the exact date of your transaction, helping you accurately track when it occurred.

Adding this detail is optional but can make your transaction history more organized and easier to review later.

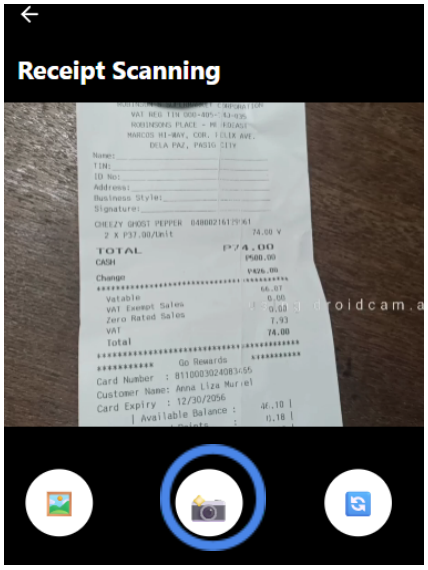

You can log the transaction in an emergency using the Emergency Fund mode. This allows you to add money to your emergency fund or subtract an amount from its remaining balance. Using this mode ensures that all changes to your emergency fund are correctly recorded and reflected in your budget.

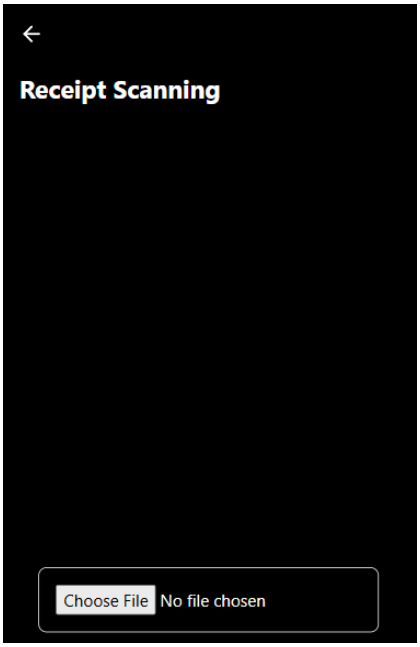

Receipt Scanning

Logging a transaction using the Receipt Scan option assumes that your transaction details will be taken from a single receipt, whether a paper copy or an electronic version.

After selecting the “Receipt Scan” option, you will be directed to a page where you can take a clear picture of the receipt you want to use as the source for your transaction details. This image will then be processed so that the app can automatically capture and extract the necessary information.

However, you may also choose to instead select and upload an existing photo on your device.

Once the photo of the receipt has been uploaded, you must then highlight the information found on the receipt, in the following order:

1. Total amount of the transaction
2. Merchant/retailer of the transaction (Optional)
3. Date of the transaction (Optional)

To highlight the information, drag your finger across the image until the red rectangle fully encompasses the required information per page.

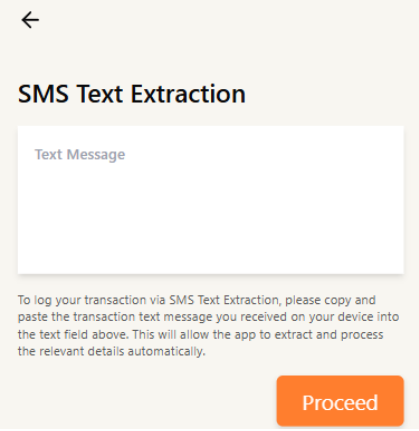

> ℹ️ **NOTE**
>
> Do take note that after highlighting the mentioned information, you MUST click the “Process selection for OCR” button for the app to properly process the text in the highlighted area.

Once you have highlighted the information, you will be redirected to the Manual Input page, with the information already input in the text fields of the page. You may then proceed to do the other steps necessary to complete the logging of your transaction.

SMS Extract

When logging a transaction using the SMS Extract option, the process assumes that your transaction details will come from an SMS message sent by a financial institution or service provider that handled your funds and approved your transaction.

After selecting the “SMS Extract” option, you will be taken to a page where you can directly copy and paste the SMS message you received into the application. The app will then process the text and automatically extract the necessary details to log your transaction.

Upon clicking the “Proceed” button, the app will use regex technology to extract the transaction amount from your SMS message automatically. Once this information is obtained, you will be redirected to the Manual Input page, where you can continue filling in the remaining details and complete the transaction logging process.

Home Page

This is the section of the application that greets you when you open PisoCAKE. It serves as your main dashboard, where most of your feedback is displayed and can be reviewed at a glance.

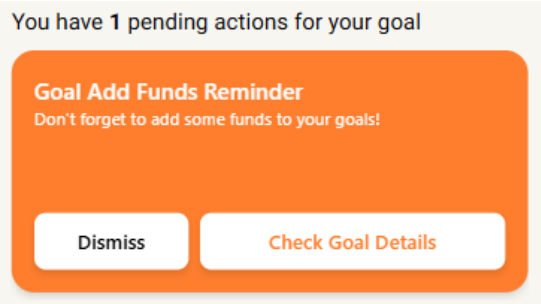

The feedback is organized into two sections:

- Goal Feedback – Provides updates, reminders, and suggestions related to your financial goals.
- Budget Feedback – Offers insights, alerts, and recommendations based on your budget activity and

Goal Feedback

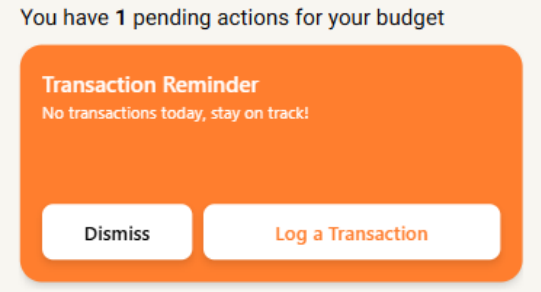

This section displays all your pending feedback related to your financial goals and details of the specific goals that require your attention. Goals may have pending feedback if you have reached certain milestones in their funding progress or are approaching their target deadline.

To review a goal that needs your attention, press the “View Goal” button, and you will be redirected to that goal’s detailed page.

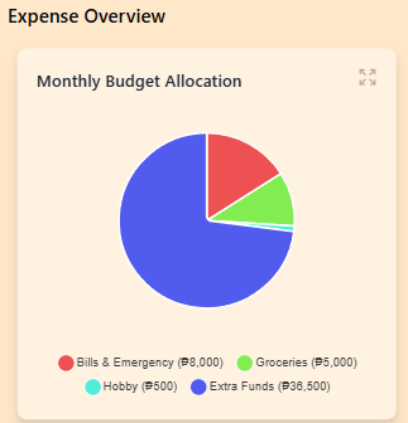

Budget Feedback

This section displays all your pending feedback related to your budget and details on the specific areas that require your attention. Budget feedback may appear if you have not logged any kind of transaction, reached a certain threshold amount in a category’s remaining amount or if the app detects unusual spending patterns. Just click on the suggested button to take action.

Expense Overview

After the feedback section, you will find the Expense Overview area, which presents your financial data through two pie charts:

1. Monthly Budget Allocation – Displays your planned or “ideal” allocation of funds across all parts of your budget, including bills, emergency fund, and each budget category. Each slice represents the maximum amount you are expected to spend for that category.

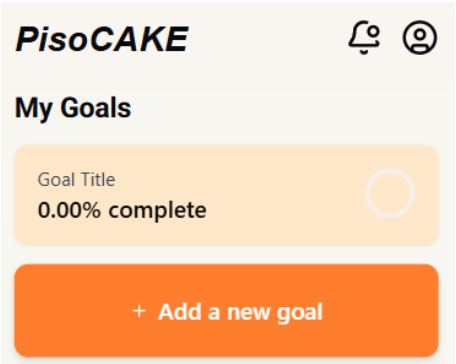

2. Actual Expenses for This Month – Shows your real spending for each budget category. Each slice represents the amount you have spent, with a separate section highlighting contributions to your financial goals.

These visualizations make it easier to compare your planned spending with your actual financial behavior.

My Goal Page

This section of the application displays all your financial goals in one place. At the top, you'll see a list of active goals (those you are still working toward) and completed goals (those you've successfully achieved).

Below the list, you'll find the "+ Add a new goal" button, which lets you create a new financial goal and start tracking your progress toward it.

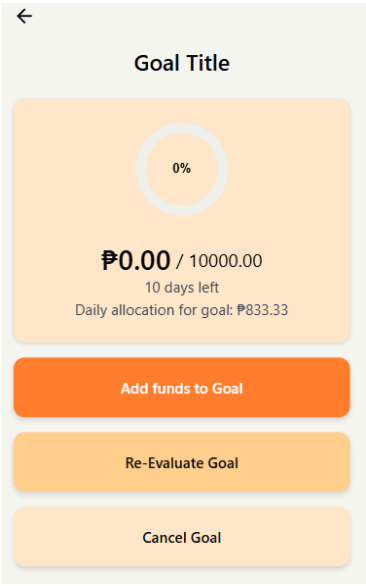

Active Financial Goal

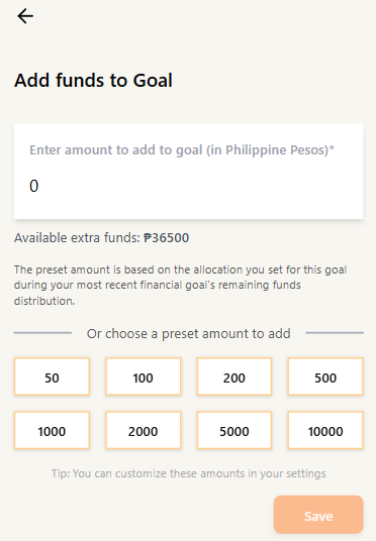

A financial goal is classified as "Active" if both of the following conditions are true:

- You have not yet reached your target amount.
- You have not yet reached your set deadline.

When you select an active goal, you will be taken to the Goal Details page, where you can view all vital information about that goal, including its progress, target amount, deadline, and any relevant notes or activity history.

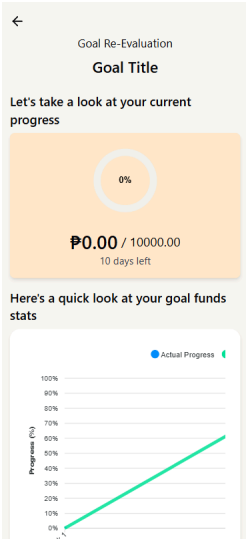

Add funds to Goal

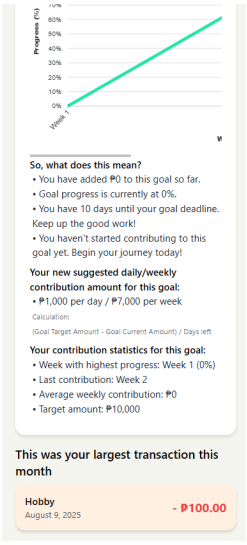

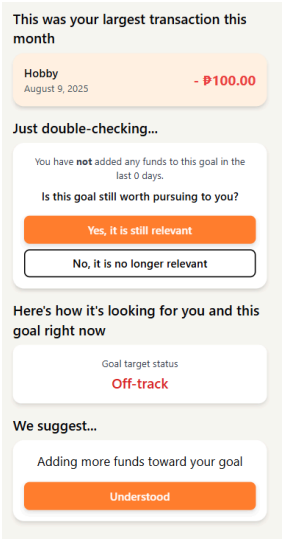

When you press the “Add Funds to Goal” button, you will be redirected to a dedicated page to allocate money from your Extra Funds toward your selected goal.

This feature lets you speed up your goal’s progress by directly increasing its current amount, helping you reach your target sooner.

Re-Evaluate Goal

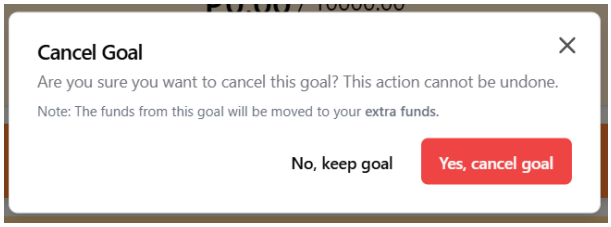

Pressing the “Re-Evaluate Goal” button will take you to the Goal Re-Evaluation Page.

This page allows you to review and adjust your financial goals details, such as the target amount, deadline, or contribution plan.

Further instructions and explanations about this process can be found on Page 39 of the User Manual.

Cancel Goal

When you select the “Cancel Goal” button, a confirmation pop-up will appear asking if you are sure you want to cancel the financial goal.

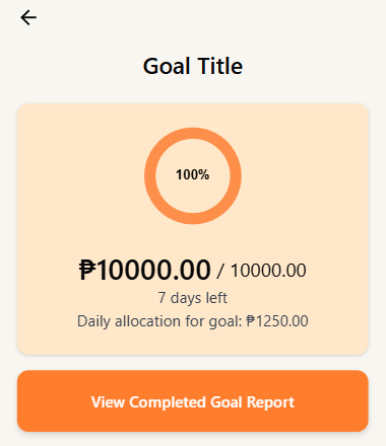

This step ensures you don’t accidentally cancel a goal, as doing so will stop all progress tracking and remove it from your list of active goals.

> ℹ️ **NOTE**
>
> **Deleting** a financial goal completely removes the goal from your list and removes all funds in your goal. This assumes that you’ve already reached your goal and have used the funds within it.
> On the other hand, **cancelling** a financial goal removes the goal from your list, but it moves the funds from your goal to your extra funds instead. This assumes that your financial goal has not been met and you would like to use the funds for something else instead.

Completed Financial Goals

A financial goal is marked as “Complete” once you have either reached your target amount or arrived at the set deadline. Selecting a completed goal will take you to its details page, where you can view all the key information about that goal.

unlike active financial goals, only one button will be available for selection: "Re-Evaluate Goal"

View Completed Goal Report

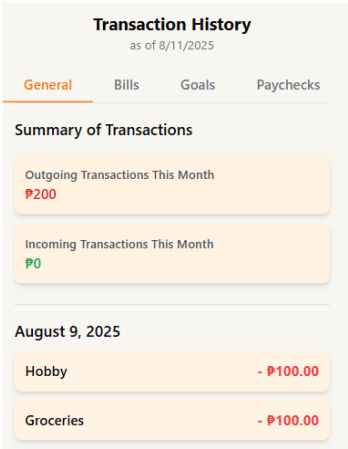

You will be taken to the Completed Goal Report page when you click the “View Completed Goal Report” button. Further details about this page can be found on Page 33 of the User Manual.

Transaction History Page

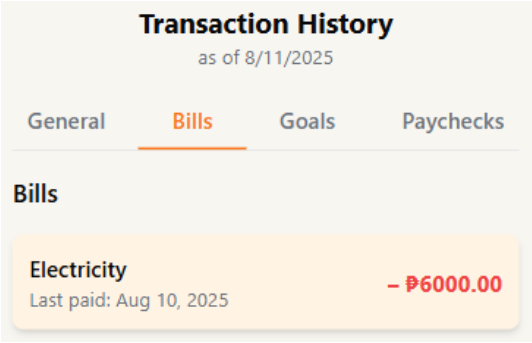

This section of the application displays a complete log of all your transactions.

When you select the “Transaction History” button from the navigation bar, you will first see the General tab. This tab provides a summary of all transactions, along with a full, unfiltered list of everything you’ve logged in the app. Most entries here relate to your budget’s various categories.

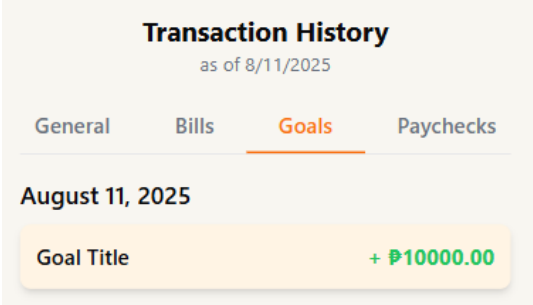

In addition to the General tab, the Transaction History page includes three other tabs for more specific views:

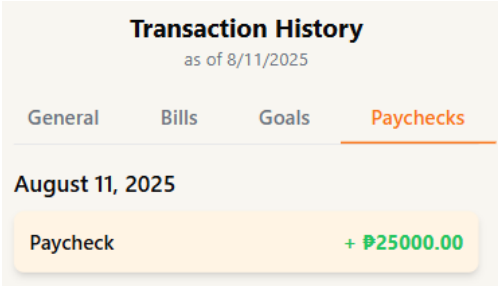

1. Bills Tab – Shows only transactions connected to your budget's bills.

2. Goals Tab – Displays only the instances where you added funds to any of your financial goals.

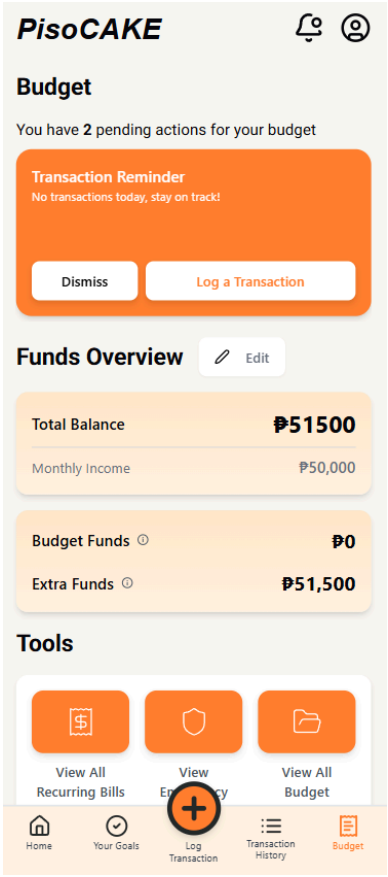

3. Paychecks Tab – Lists only the times you completed the Paycheck process (more details about this process are available on Page XX of the User Manual).

Budget Page

This section of the application contains all the key information about your budget.

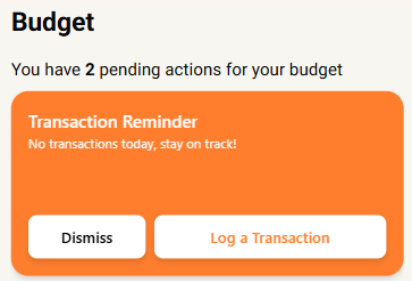

The Budget page is organized into three (3) main sections:

- Feedback – Provides updates and alerts about your budget's performance and spending patterns.
- Funds Overview – Displays a breakdown of your available funds, allocations, and remaining balances.
- Tools – Offers features and functions to help you manage, adjust, and optimize your budget.

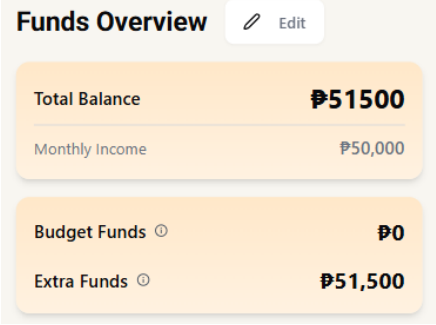

Feedback

The top section of the page presents budget-related feedback that needs your immediate attention.

Funds

Following the feedback section is the Funds Overview, which outlines your key financial figures:

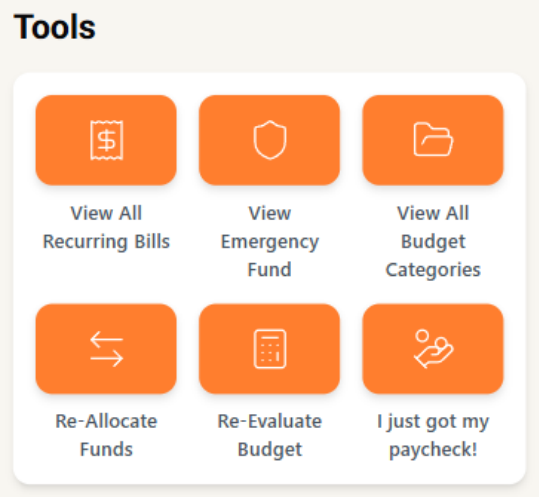

- Total Balance – The combined total of your Budget and Extra Funds, representing your overall available money.
- Monthly Income – The fixed monthly income you specified during the onboarding process.

- Budget Funds – The portion of your money allocated for recurring bills and budget categories, covering your essential financial obligations.
- Extra Funds – Money is primarily intended to contribute to financial goals, but is also available for expenses outside your set bills and budget categories.

Tools

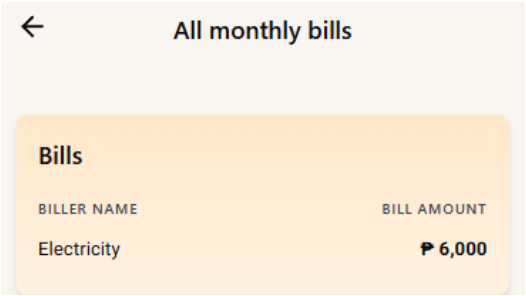

The Tools section of the Budget page provides quick access to various app functions through the following buttons:

- View All Recurring Bills – Displays the complete list of your set recurring bills.
- View Emergency Fund – Opens the details of your emergency fund.
- View All Budget Categories – Shows all budget categories you've created.
- Re-Allocate Funds – Allows you to redistribute your available funds between categories or funds.
- Re-Evaluate Budget – Lets you review and adjust your budget settings.
- I just got my paycheck! (Paycheck Process) – Initiates the process for adding your paycheck and updating your available funds.

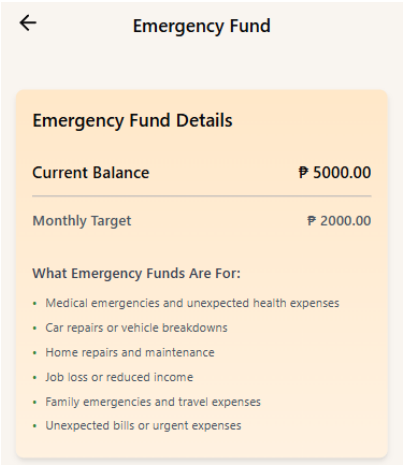

View All Recurring Bills

Selecting this button takes you to a page displaying a complete list of recurring bills, helping you easily track and manage all payments.

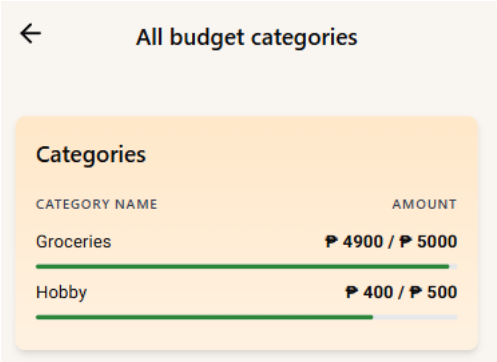

View Emergency Fund

Clicking this button takes you to a page displaying your emergency fund details. Here, you can view your current emergency fund balance, your target monthly contribution amount, and information on the intended purpose of these funds.

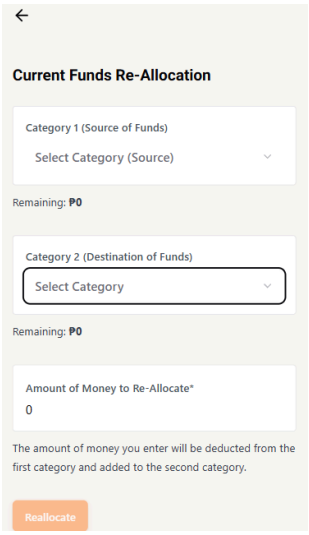

View All Budget Categories

Clicking this button takes you to a page showing all your budget categories. For each category, you will see the amount you have allocated per month and the remaining amount available for spending.

Re-Allocate Funds

This page allows you to move funds between different categories in your budget.

- Category 1 (Source of Funds): Select the category from which you want to take funds. This list also includes your Extra Funds, allowing you to allocate money to another budget category.
- Category 2 (Destination of Funds): Select the category to which you want to add the funds.
- Amount of Money to Re-Allocate: Enter the amount you wish to transfer. This amount will be deducted from Category 1 and added to Category 2.

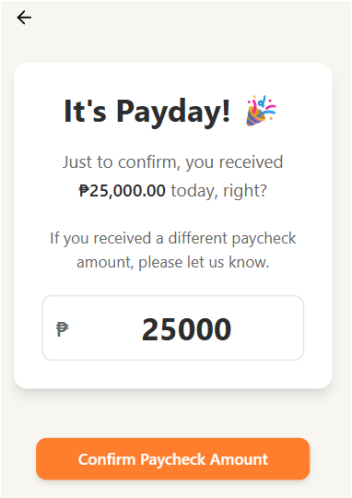

Once all fields are set, click Reallocate to apply the changes.

Re-Evaluate Budget

Upon selecting the “Re-Evaluate Budget” button, you will be taken to the Budget Re-Evaluation Page.

Further details about this page can be found on Page 41.

I just got my paycheck!

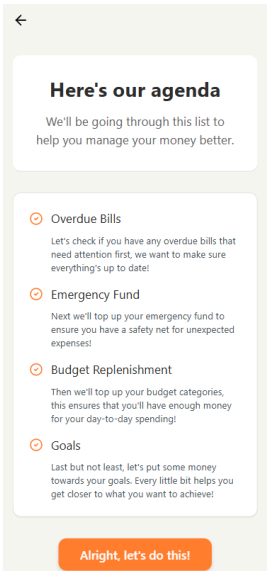

You should only click “I just got my paycheck!” if you have received your paycheck. This action will take you to a page where you need to confirm your paycheck amount.

The displayed amount will vary depending on your selected paycheck frequency:

(in this image it is shown that the amount is 25,000 with a bi-weekly setting from the monthly allowance of 50,000)

- Monthly – The amount will match the monthly income you entered during the onboarding process.
- Bi-weekly – Your monthly income will be divided by 2.
- Weekly – Your monthly income will be divided by 4.
- Daily – Your monthly income will be divided by 30.

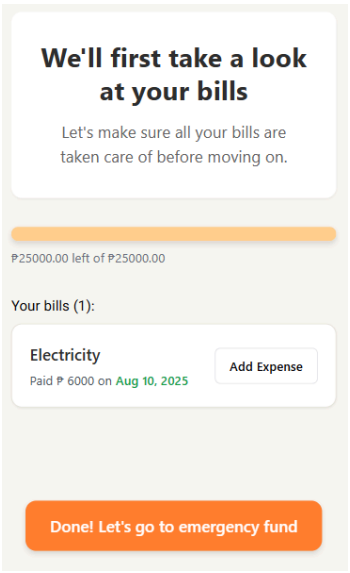

Once you have confirmed the amount, whether you have edited it or kept it as is, you will proceed to the next page.

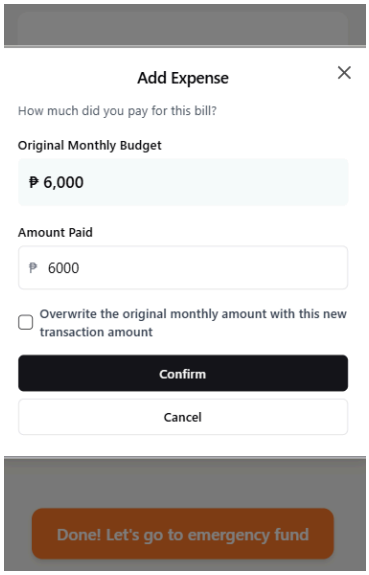

This page provides general information about the steps involved in the paycheck process, designed to guide and assist you in developing better financial habits and maturity.

You will now begin the paycheck process by reviewing your bills. This page helps you confirm whether your bills have been paid by displaying a list of your bills, their respective amounts, and the latest payment transaction made for each bill.

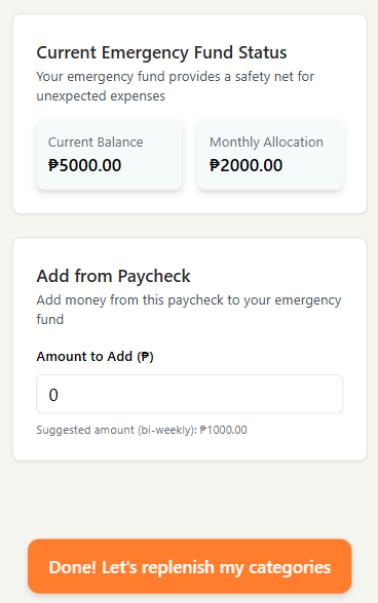

If you need to pay, you can do so through the “Add Expense” button, which will open a payment method pop-up. Here, you can pay the bill amount directly and optionally check a box to overwrite the set amount.

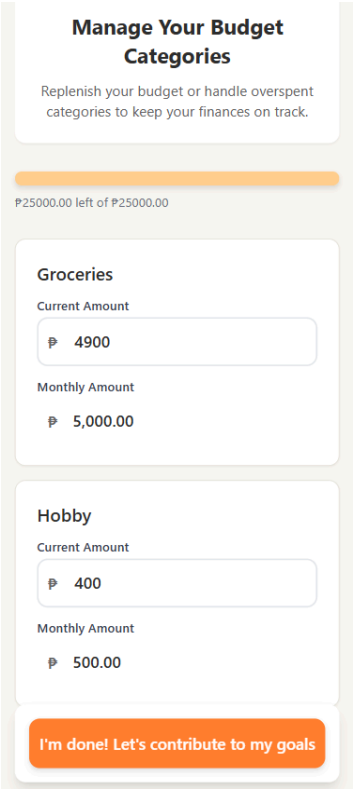

Once you have finished updating your bills or if there are no issues to address you can proceed by selecting the “Done! Let’s go to emergency fund” button”.

The second process of the paycheck would now be the updating of the emergency fund.

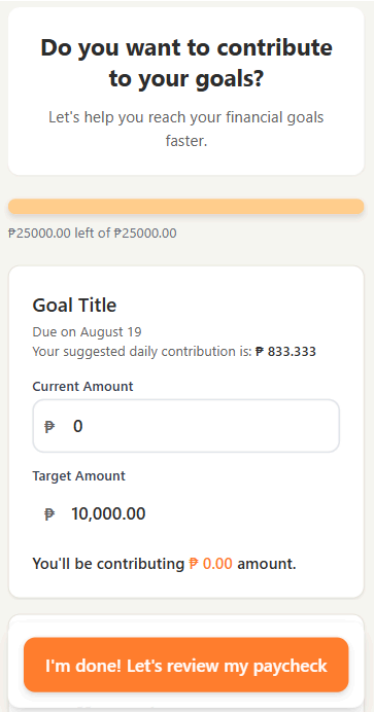

On this page, you will see the current balance of your emergency fund along with your target contribution amount. You also have the option to add more funds to your emergency fund at this stage. If you choose not to add any, you can proceed to the next step by selecting the “Done! Let’s replenish my categories” button.

The third process of the paycheck is replenishing your budget categories.

This page lists all your budget categories, showing both their remaining amounts and the set amounts you established during “Budget Setup.” You can replenish or adjust the funds for each category by adding or subtracting by directly overwriting the remaining amount for the category you wish to update.

Whether or not you choose to replenish your budget categories, you can proceed to the next step by pressing the “I’m done! Let’s contribute to my goals” button.

Here, you are guided to stay on track with your personal financial goals. You can choose to contribute any amount you wish toward your goals, helping you reach and complete them more efficiently.

Re-Evaluation Page

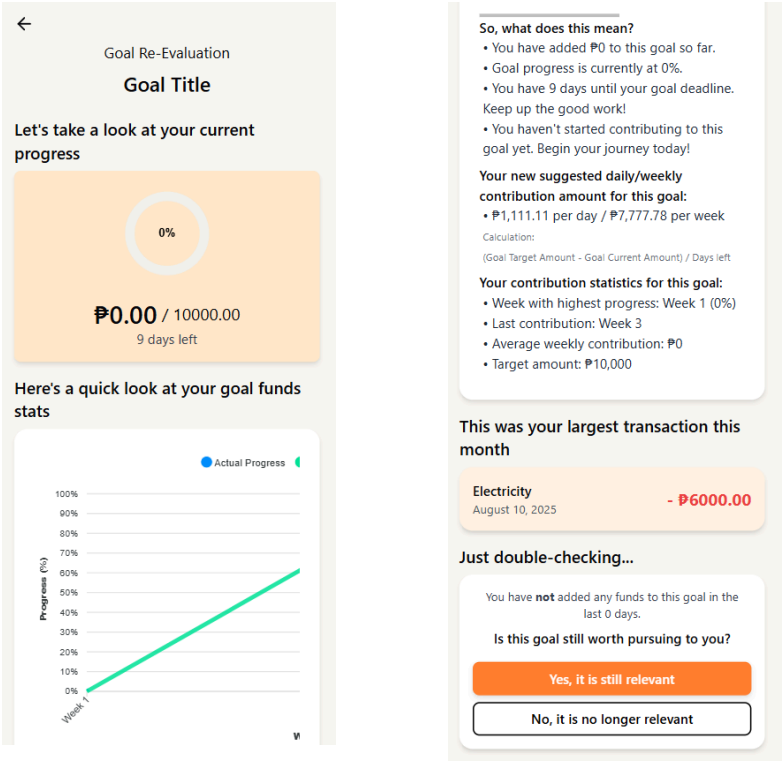

The PisoCAKE app prides itself on being a feedback-first platform. It provides users with clear, contextual, and actionable information to help them understand their next steps, make informed decisions, and continuously improve their financial habits.

To support this approach, the app features three dedicated re-evaluation pages:

- Goal Re-Evaluation

- Budget Re-Evaluation
- Completed Goal Report

Goal Re-Evaluation

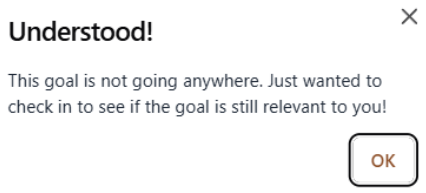

The Goal Re-Evaluation page comprehensively overviews your progress toward a specific financial goal. At the top, you will see the current and target amounts for the goal. Below this, a line chart compares your actual progress with the ideal progress, giving you a clear visual of your pace toward completion.
Key details are also provided, including:

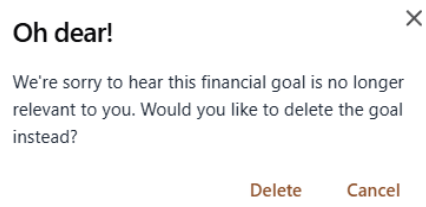

- The total amount you have contributed to the goal so far
- The time remaining until the deadline
- Personalized feedback based on your progress and activity

Additionally, the page highlights your largest transaction for the current month and prompts you to confirm whether the goal is still worth pursuing.
You are presented with two options:

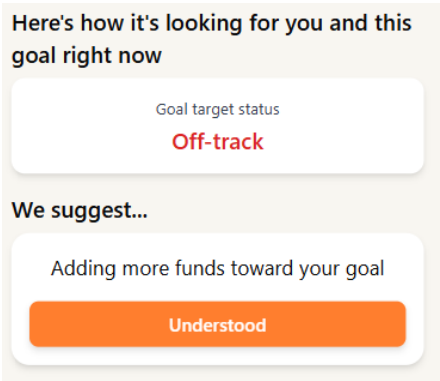

- "Yes, it is still relevant" – Confirms that you want to continue working toward this goal. Choosing this will display a pop-up acknowledging that this check-in helps ensure your commitment.

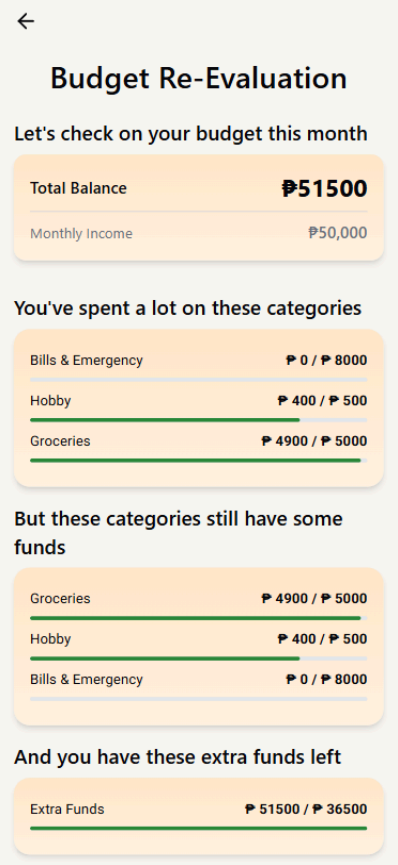

- "No, it is no longer relevant" – Indicates that you have decided to give up on the goal. Choosing this will display a pop-up to delete the goal.

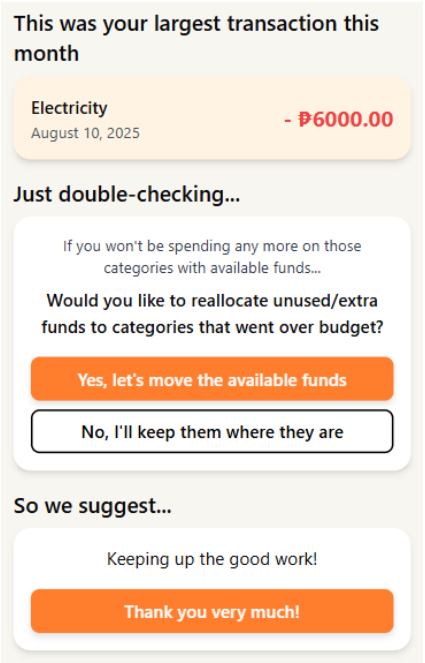

Lastly, the page displays a tracking status that summarizes your progress toward the goal. From here, you also have the option to add funds to help you reach your target faster. When you click the “Understood” button, you will be redirected to the Add Funds to Goal page.

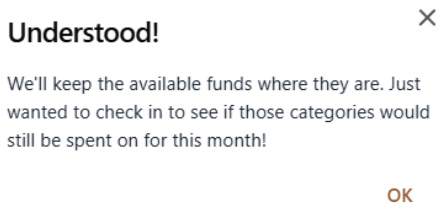

Budget Re-Evaluation

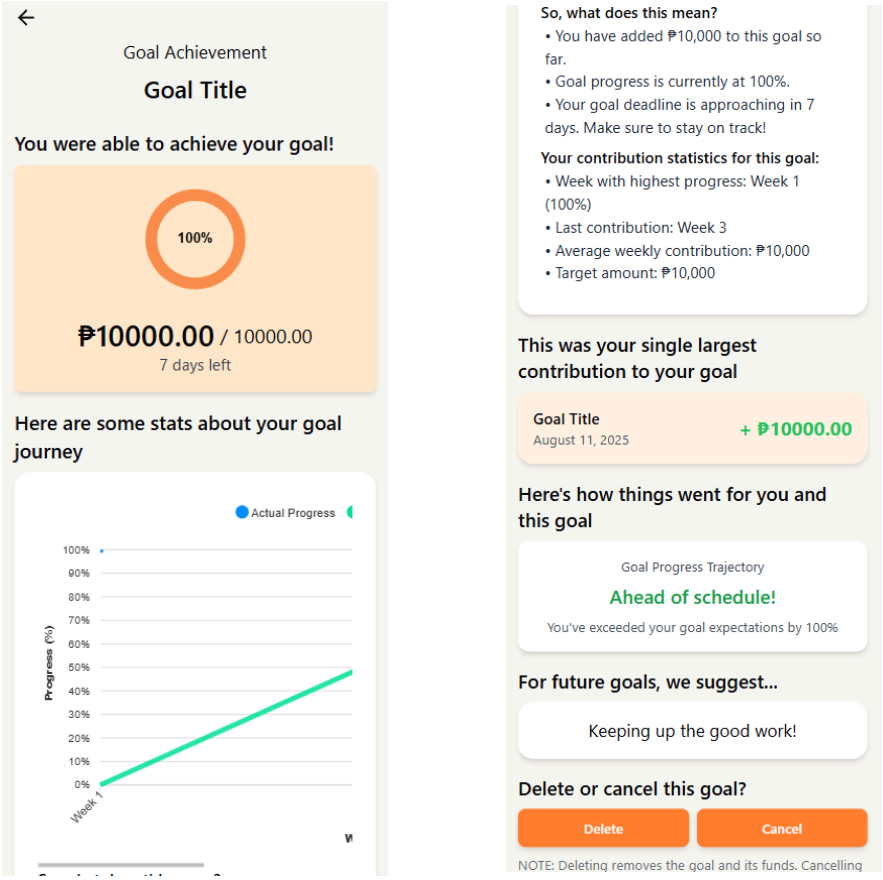

This page presents your budget categories, calculated from the total balance of your Extra Funds and Monthly Income. Categories are shown in descending order based on where you have spent the most, and in ascending order for categories where you still have available funds. Similar to the Goal Re-Evaluation page, it also highlights your largest transaction for the month.

You are then given the choice to reallocate your budget if needed by selecting “Yes, let’s move the available funds”, which will take you to the Re-Allocate Budget Page. If you decide not to make changes and select “No, I’ll keep them where they are”, a simple confirmation pop-up will appear.

Lastly, you will receive a simple suggestion to “keep up the good work.” Once you press the “Thank you very much!” button, you will be redirected back to the Budget Page.

Complete Goal Report

Similar to the “Goal Re-Evaluation” page provides a detailed summary of your performance in achieving a financial goal. It highlights your target amount, actual amount saved, the timeline of your progress. It also displays the largest contribution you have made in this goal. You’ll also receive contextual feedback to “Keeping up the good work” to stay motivated for future goals.

This page also provides the option to delete the completed goal entirely. (Read the note below)

> ℹ️ **NOTE**
>
> **Deleting** a financial goal completely removes the goal from your list and removes all funds in your goal. This assumes that you’ve already reached your goal and have used the funds within it.

On the other hand, **cancelling** a financial goal removes the goal from your list, but it moves the funds from your goal to your extra funds instead. This assumes that your financial goal has not been met and you would like to use the funds for something else instead.

Other Concerns

Suppose you require assistance with any part of the application, whether you have questions about a specific feature or need clarification on general functionality. Please feel free to reach out to us at any time. Our team of dedicated facilitators is always ready to provide guidance, answer your questions, and help you navigate any challenges you may face while using the PisoCAKE app.

You can find the contact details for our facilitators on the following page. They are committed to supporting you every step of the way on your financial journey with PisoCAKE.

Contact Information

If you have any questions or inquiries about the PisoCAKE app, the experiment, or the thesis study, please feel free to contact any of the facilitators listed below. They will be more than happy to assist you and provide the information or guidance you need.
