Software Engineer | Frontend & UI/UX Specialist

Frontend Engineer and BS Computer Science graduate specializing in web and software engineering, with a focus on modern frontend architecture, UI component systems, and user interface engineering. Skilled in building responsive applications using React, Next.js, and TypeScript, with practical experience integrating RESTful APIs and handling component state. Strong focus on building clean & maintainable user interfaces from design through deployment.

Education

De La Salle University, Manila Oct 2021 to Feb 2026
Bachelor of Science in Computer Science Major in Software Technology
CGPA: 3.35 / 4.00 (Honorable Mention)

Experience

ARVRDEV Intern, DLSU GAME Lab, Manila May 2024 to Aug 2024
C#, Unity, Vuforia Engine

- Developed and modernized university AR/VR courseware using Unity (C#) and Vuforia Engine, replacing deprecated components to ensure continued functionality
- Collaborated within a 3-person team to build and refactor multiple marker-based & markerless augmented reality scenes integrated into a unified demo mobile application
- Participated in weekly development and progress meetings, stakeholder discussions, and application testing within a structured development workflow

Projects

PisoCAKE - Finance Tracking PWA (Bachelor's Thesis) May 2024 to Jul 2025
React, Next.js, TypeScript, Tailwind CSS, Figma

- Built a finance tracking PWA that enabled users to set financial goals, log transactions, and monitor spending as part of a 4-person team
- Led end-to-end UI/UX design and iterative prototyping, producing high-fidelity prototypes in Figma and translating them into a production-ready Next.js frontend using TypeScript & Tailwind CSS
- Implemented responsive component-based architecture & helped align frontend functionality with the application's data models & schema
- Conducted a 2-week user field study of the completed application to evaluate usability and financial tracking effectiveness

My Wander Diary - Photo-Journal Android App Sep 2024 to Dec 2024
Kotlin, Android Studio, Figma

- Developed an Android photo-journal app using Kotlin and Android Studio, supporting the creation, organization, and browsing of travel entries with photos in collaboration with a project partner
- Led end-to-end UI/UX design and prototyping in Figma, implementing the designs into responsive UI components and navigation flows

JPD Garage Online Management System Sep 2023 to Apr 2024
Bootstrap, React.js, Agile, Figma

- Developed a web-based finance and inventory management system for a motorcycle parts business in Laguna
- Led frontend implementation, converting high-fidelity Figma prototypes into a functional web interface using React and Bootstrap
- Collaborated in a 9-person Scrum team, participating in sprint planning, stand-ups, and milestone reviews with the product owner
- Delivered working features aligned with business requirements, supporting transaction tracking and inventory monitoring

Technical Proficiencies

Frontend:	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap
Design & UI/UX:	Figma, Wireframing, User Flows, Interactive Prototyping, Iterative Design
Backend & Database:	Node.js, Express.js, Supabase, RESTful APIs, MySQL, MongoDB
Other Languages:	Java, Python, C, C++, Kotlin, SQL
Tools & Platforms:	Git, GitHub, Vercel, npm, Amazon Web Services (AWS), Docker, Android Studio, VSCode, IntelliJ
Core Concepts:	Version Control, Responsive Design, Component-Based UI Architecture, Agile/Scrum Methodology
